

OneStop™ 3.0: A New Level of Self-Service

OneStop™ 3.0 combines an engaging new interface for patron self-service with a customizable platform to showcase library news, events and more.

Modern and intuitive, version 3.0 works with EnvisionWare's hardware, including our new X11 line, or your existing hardware to provide a cost-effective and flexible software solution.

ENGAGE PATRONS AND PROMOTE LIBRARY SERVICES

OneStop 3.0 takes customization to a new level, enabling you to use your own photos to showcase your library or community, select from a bank of out-of-the box themes, or a combination.

With 3.0, you can also use the interface to announce library news and events with graphics or stream from your library's website or other feeds in real-time on the screen.

THEME OPTIONS

SEASONS

Choose from multiple images each season to keep your self-checkouts fresh.

CHILDREN'S IMAGINATIVE

Whimsical photos to draw the attention of even your youngest readers.

READING CLASSIC

Engaging photos for patrons of all ages.

NEWS & EVENTS

Promote library events with these out-of-the box announcements.

OneStop™ 3.0: A New Level of Self-Service (Continued)

EVEN EASIER TO CUSTOMIZE AND CONFIGURE

Make OneStop 3.0 an extension of your library's brand with easy-to-use tools. With 3.0, you can still add your library logo and change the color palette to match with our color selecting tool. You can also change the color of the buttons to match or opt for the new graphical buttons, depending on your preference.

Checkout and Intelligent Returns Mode were updated to include a new vertical hold slip template.

NEW ARCHITECTURE AND CENTRALIZED STATISTICS FOR FAST AND MODERN PERFORMANCE

Version 3.0 is built to run from a single HTML5 page for faster performance and the ability to leverage the latest web elements for a modern user experience.

New animations adapt to the specific configuration, prompting patrons with intuitive imagery that mimics your platform, including both RFID and barcode. If you incorporate a media case controller, the animation changes to show the difference between media and print check out. The release also includes new sound effects for successful and failed transactions.

In addition to running reports at each OneStop station, version 3.0 aggregates data in a central MySQL database. Track everything - language choices, items per session, busy times and more.

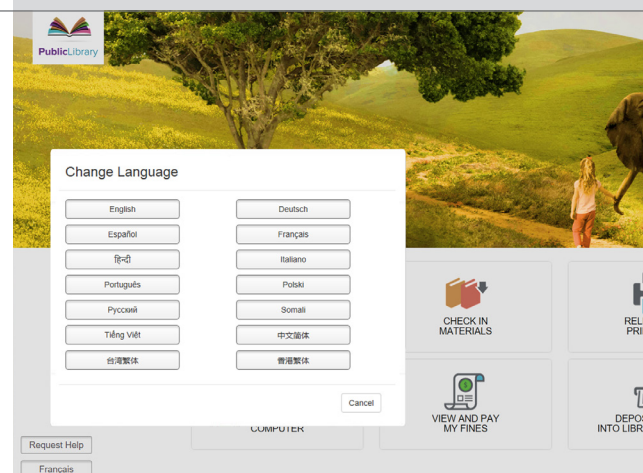

The next release of EnvisionWare Enterprise Reporter will also enable you to view data in vivid, graphical dashboards

ENHANCED LANGUAGE CHOICES AND NEW ACCOUNT FUNCTIONALITY

Based on customer feedback, version 3.0 offers even more language choices. In addition to English, Spanish, French, Polish, Chinese and Taiwanese, language options also include German, Russian, Hindi, Somali, Italian, Portuguese and Vietnamese. As always, all translations are included at no additional cost, and you can customize languages to suit your locale.

OneStop 3.0 also includes the ability for patrons to access, view and print their account information from the main menu screen.

OneStop™ 3.0: A New Level of Self-Service (Continued)

RFID SELF-CHECKOUT NOW EVEN FASTER AND EASIER

New RFID-based patron card functionality enables users to place their library card and a stack of items on the pad and check out in an instant.

"YOUR HARDWARE OR OURS" INCLUDES NEW OPTIONS

OneStop is still designed to help libraries maximize their resources by using existing hardware or selecting from EnvisionWare's cost-effective suite of self-service hardware, including our new X11 line of desktop and kiosk hardware. Intuitive and flexible, OneStop automatically adapts based on hardware resolution, making installation and configuration a breeze.

PLACE A HOLD ON THE NEXT BEST READ

Integration with NovelList Select for Self-checkout now includes the ability to place a hold during the checkout process in addition to printing and emailing receipts. (Available through subscription.)
