

OneStop™ 3.1

OneStop™ is bigger and better than ever in version 3.1, including enhanced graphics and accessibility tools, more language options, and integrated eCommerce functionality that makes the patron self-service experience even easier and faster.

3.1 GOES BIG ON USER EXPERIENCE

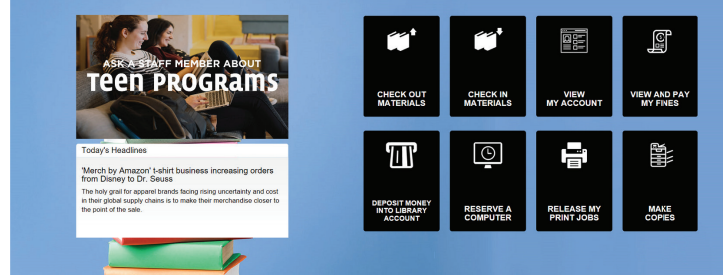

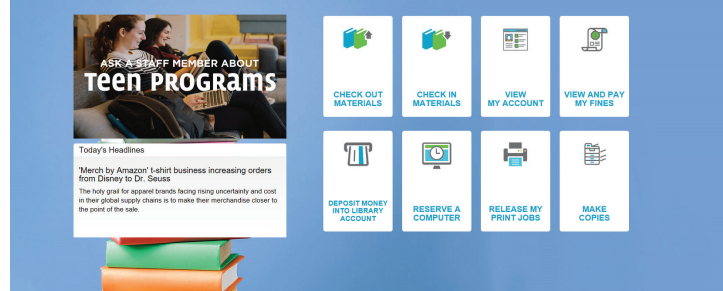

In version 3.1 we've boosted the graphics and font on the user interface to make self-service even more intuitive. 3.1 still offers the same extensive theme options and customization capabilities as the current version while making the most of the available screen space.

OneStop™ 3.1 (Continued)

ACCESSIBILITY FEATURES AT YOUR FINGERTIPS

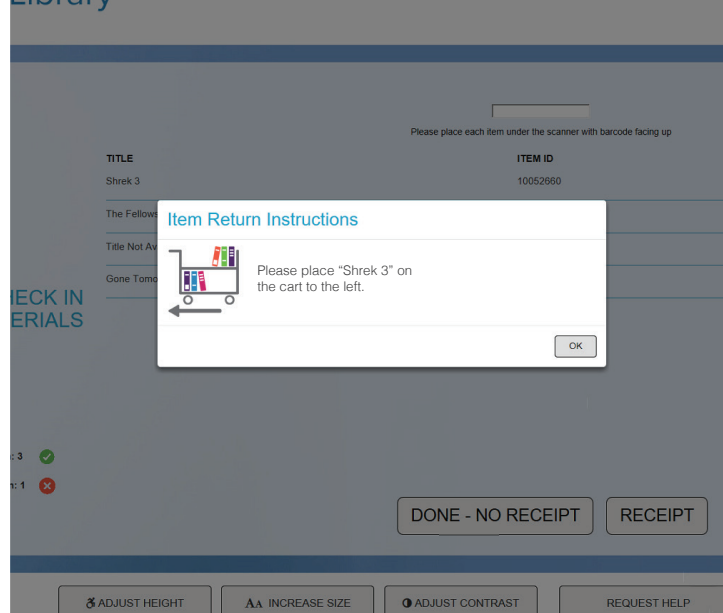

Features such as high contrast mode, increased font and the ability to adjust the screen height are prominently displayed and each available at the touch of a button, making it simple for patrons to select the tools they need for an easy and comfortable self-checkout experience.

DIRECTIONAL GRAPHICS MAKE FOR EASIER RETURNS

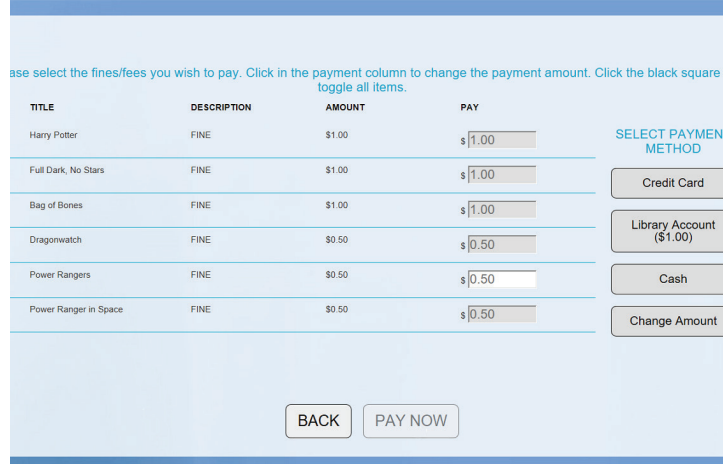

You asked and we listened! Libraries now have the option to display graphical, directional messages for patron returns for bins, shelves and carts to alleviate the need for paper signage and capture the patron’s attention in real-time at the point of return.

A new rapid returns mode provides a quick display of return information including the item destination. This mode also prints customized hold slips as items are checked in.

EXPANDED FINE PAYMENT CHOICES TO EMPOWER PATRONS

For Libraries that prefer to offer patrons more choices in fine payments, 3.1 enables patrons to touch to select which fines they want to pay from an itemized list during checkout*.

* Subject to capabilities of your ILS.

OneStop™ 3.1 (Continued)

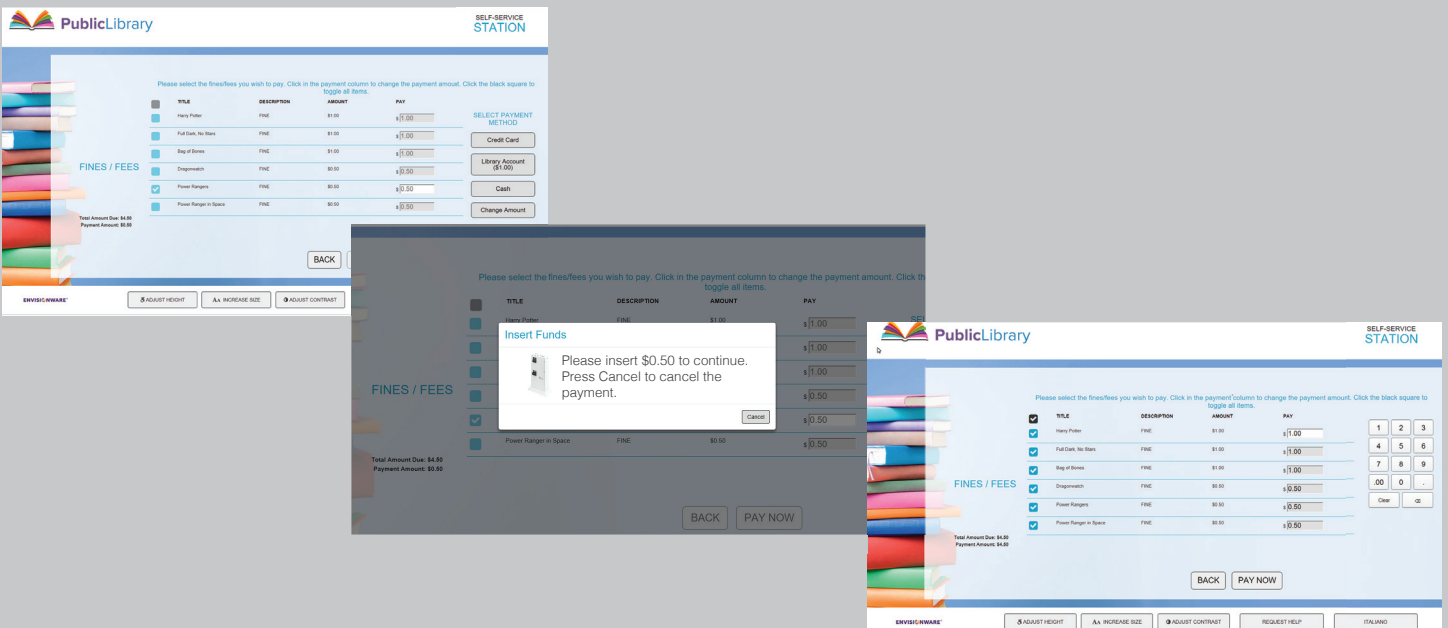

EVEN MORE LANGUAGES TO CHOOSE FROM

Language options now include Maori and Arabic, bringing the total number of languages up to 16. Tagalog will also soon be available.

INTEGRATED PAYMENT EXPERIENCE

OneStop now offers integrated fine payment options that make it quick and easy for users to select how they want to pay. Intuitive graphics walk users through the payment process so they can pay and be on their way.
