

St Michael's introduces Self-Service Checkout for their students.

When St Michael's College located in Henley Beach, South Australia wanted to provide their students with a premium quality and easy to use self-check solution in their newly redeveloped Secondary Campus Library, they turned to EnvisionWare as a trusted vendor partner.

St Michael's College Secondary Campus Library serves approximately 1500 Year 7 to Year 12 students.

Students checking out items

St Michael's College implemented the EnvisionWare® X11 Countertop Self-Circulation system which allows their students to checkout their items easily and quickly.

Student checking out a book

“The implementation of the EnvisionWare Self-Circulation solution has made a difference, allowing our staff to guide and be a part of the students’ initial selecting process as well as reallocate more time to providing additional services to our students”, said Head of Library, Maria Pepe-Micholos. “The ability for students to check out their own materials has been very popular with students from all grades, the younger students in particular enjoy using the RFID self-check system. The X11 Self-Service Circulation unit is consistently reliable, and we know that we can depend on the EnvisionWare Customer Service team to provide excellent support to keep our services running smoothly.”
