Community Seal of Approval for the 24-Hour Library™

To those attending the 24-Hour Library™ ribbon cutting for Licking County Library in Ohio, it was less about what fourth grader Macie Adkins said than how she said it. "Macie's expressions were priceless, particularly when she talked about encouraging her friends to come and use the 24-Hour Library," said EnvisionWare CEO and co-founder Mike Monk who attended the event. "Her enthusiasm was catching and underscored just how much of an impact the library is having by extending services to this part of the community."

The 24-Hour Library opened in partnership with Central Ohio Technical College (COTC) to provide service to a growing area in the Licking Heights School District. The location is on the far west side of the library district that does not have a branch nearby. Installed in the COTC parking lot, the 24-Hour Library will provide easy access to library services for local residents, COTC students, and the growing number of commuters. Deemed "24/7 Broad Street," the 24-Hour Library offers a collection of 340 items including books, DVD's and audiobooks, as well as digital e-books, holds pick-up and return. The location also serves as a Wi-Fi Hotspot.

We service a broad geographic area, which makes it challenging to provide coverage throughout the entire district," said Library Director Babette Wofter.

"Our bookmobile will continue to serve community spots and the schools, but the 24/7 Broad location will assure that we have a permanent location for this heavily populated and growing area."
